

Digital Dictation is an IT based technology, which allows you to store a voice recording as a digital file, which can also be transferred via e-mail or network, for easy transcription

Over the years, digital dictation has become an increasingly popular tool in environments where speed is a critical factor such as in the legal and healthcare market. This is due to the fact that the spoken word is the most effective way to communicate. We actually speak seven times faster than we can write. Letters, notes and memos can be recorded far more efficiently and effectively. To help you decide, here are some facts and benefits to help you choose:

- **Superior Digital Sound Quality** - Clear, precise recording and playback for quick and easy transcription
- **Extensive Editing Facilities** - Total flexibility with instant access to any part of the recording, giving the opportunity to insert and delete words
- **Increased Efficiency** - Digital files available immediately for faster turnaround of completed documents. In addition, a high level of reduction in backlog as files or folders can be accessed by multiple secretaries, saving time and cost
- **Easy & Simple Workload Management** - Work remotely anywhere in the world and transfer data quickly and simply via e-mail or PC network at the touch of a button
- **Increased Recording Time** - With the use of an industry standard memory card rather than a tape
- **Future Proof** - Designed to be used with the latest workflow management and speech recognition systems

How It All Works...

Over the next three pages you will find a wide range of machines from Philips, Sanyo and Olympus. If you cannot find the model you are looking for please call us

Manufacturer	Sanyo
Type	Digital Notetaker
Model Number	ICR B31
Recording Time	7 Hours
Memory	16Mb
Microphone & Headphone Socket	✓
Voice Activation	✓
Accessories Included	USB Cable, Multi Media Card, CD ROM, Audio Cable, I/O Cable, Case
Code	NT3760
List Price	£49.00 [2]
Now Only	£47.50

Sanyo FSUSB/MS Basic Transcription Kit

- Basic Transcription Kit
- Comes with USB foot control for hands free control of transcription software and headset for confidential playback and PC software on CD-Rom
- Connects via USB interface

NT3762

List Price £98.51 [2]

Now Only £88.65
